

TRAIL POST 3

We want s'more math! Campers love sitting around the campfire and making s'mores! Help the campers figure out how many they can make!

At the s'more station, you grabbed a handful of marshmallows. Let's figure out how many s'mores can you make!

In your journal show many pieces of chocolate you will need so each marshmallow has 1 piece of chocolate for the s'more.

Show your thinking using pictures, numbers and words.

How many sticks do you need to roast the marshmallows over the campfire? Show your thinking.
